

FOR IMMEDIATE RELEASE:

American Educational Telecommunications LLC (AET) has opened offices at the **Scott Technology Center** in Omaha, NE specifically to incubate **CenatMed, LLC**. CenatMed, LLC is a collaborative effort with the **University of Nebraska's Peter Kiewit Institute (PKI)** focused on enhancing medical devices through highly creative adaptation of currently available industrial technology.

The Scott Technology Center offered the perfect environment for this activity, due to their theme of bringing together human capital, business partners, venture capital, and academic organizations for taking innovative companies to higher levels.

In particular, CenatMed, PKI faculty and PKI Students are concentrating the adaptation efforts in the area of medical device innovation, utilizing advanced communication through wireless and optical technology. The recently organized company is being managed by **Tino Bellanca** with engineering direction from **Bing Chen, PhD**, Chairman of the department of Computer and Electronic Engineering at the University of Nebraska, Omaha, campus.

By combining the presence of the Scott Technology Center and the resources at the Peter Kiewit Institute, a "state-of-the-art" Information Technology and Engineering institution, both AET and CenatMed enjoy the position of being in the heart of the Midwest's most advanced facilities. Worldwide attention is being focused on these leading organizations, which provide the resources necessary to make AET and CenatMed projects highly viable.

AET specializes in telemedicine applications and systems, and is on the forefront of providing real time patient encounters, along with real time medical images, from rural areas to specialty medical consultants at regional medical centers. More recently, AET has added special diagnostic instrumentation to its telemedicine systems, and has expanded its medical marketing and sales' activities in the Midwest States. AET operates from Omaha with coverage throughout adjoining Midwest states.

Since 1999, AET, LLC, has been engaged in telemedicine and in telehealth programming for consumer and professional use. The company has been active in both domestic US and International markets. The corporate offices are located in Norfolk, NE, together with a sister company, Midwest Health Partners. Both firms were founded, and are under the direction of, Keith W. Vrbicky, MD. In regard to this activity with the Peter Kiewit Institute, Dr. Vrbicky stated "It is most gratifying to have the opportunity to work with a world-class institute (PKI) and strive to technically improve on today's current medical devices that will ultimately enhance the accessibility and quality of care for patients. We are pleased to be a part of the ever expanding technology focus on the city of Omaha."
